

Additional Terms and Conditions for Air Tables

For all orders:

- Air tables ship direct from the Manufacturer in West Peabody MA, 01960, USA to the location/address specified at the time of order.
- Lead time is approximately 4 weeks, plus delivery time.
- Drayage to the laboratory and installation are NOT included.
- **OnTrak™** crating is available for **CleanBench** tables for an additional charge.
 - This easy roll-off option simplifies table rigging and installation.
 - **If you chose this option, you will need to purchase casters at the time of ordering your table.**
 - With OnTrack, your table ships pre-installed on the isolator frame and can be rolled off the crate.
- Instruments ordered from Sutter Instrument at the same time are shipped separately and may arrive before you receive the air table.
- **Warranty:** Air Tables come with a 1-year limited warranty for parts and labor. Extended warranties are not available.

Things to keep in mind before ordering:

- Check to see that you have an accessible loading dock that can receive pallet shipments.
- Check to determine if the table size desired will fit through doorways, in elevators and down hallways. (There may be an option of ordering 2 smaller tables and joining them together). This is especially important if the OnTrak option is ordered.
- Check to see if there is any construction planned which would obstruct delivery.

Air Supply requirements:

- House or compressed air is appropriate for your air table, with the following specifications:
 - Pressure > 30 psi - max. 80 psi, depending on payload
 - Quality Dry, oil-free (in-line filter comes installed)
 - Fittings 1/4-inch press-lock (quick-fit), or threading for 1/8- or 1/4-inch NPT fittings (adapters)
- If you need a compressor, you can purchase one from Sutter Instrument. You will need either the 110V or 220V version. (Sutter part numbers: AT-COMP-110 or AT-COMP-220)

Installation:

- Most Universities have a facilities department that is familiar with air table installation. If your institution does not have a facilities department capable of installing the air table, you may wish to hire a third-party installer or rigger.

Domestic Orders:

- Orders shipping in the United States ship ground freight, door-to-loading dock, unless otherwise specified at the time of order.

International Orders:

- All international orders require a Form BIS-711 to be completed by the end user and provided at the time of order.
- International orders ship air freight door-to-door (loading dock), unless otherwise specified at the time of order.
- If your institutions payment terms are for payment in advance, or by letter of credit, we will not be able to place the order with the Manufacturer until prepayment or the L/C is received by Sutter Instrument.
