SERVICE & SUPPORT

Thank you for choosing Sutter Instrument products. To guarantee the highest standards of quality and performance, every instrument is fabricated on site by highly skilled technicians. The instrument contained herein has been assembled with care and tested to assure it meets rigid quality control standards.

We hope that our instruments and products continually meet your needs. However, should a problem arise, please contact our technical support staff to discuss your concerns. If the instrument requires factory service, we will furnish shipping instructions. Items under warranty will be repaired free of any costs, for parts or service. Both delivery and return shipping costs are the responsibility of the owner.

This product carries a limited warranty of 2 years for parts and labor.

Our office hours are 8:00 am to 5:00 pm Pacific Standard Time, Monday through Friday.

SET-UP INSTRUCTIONS
**THE MANUAL X-Y TRANSLATOR**

The MT-500 is shipped fully assembled and ready for installation. Read the instructions carefully. If you have any questions, please contact Sutter Instrument for assistance.

**SET-UP INSTRUCTIONS**

1. **REMOVE THE SHIPPING SCREWS:** After unpacking it is important to remove two shipping screws. One screw secures the top plate and one secures the bottom plate during delivery. Photos on the right show the location of both shipping screws. Make sure you move the unit carefully after removing the shipping screws.

   **NOTE:** If you need to transport the MT-500 in the future, re-secure the top and bottom plates with the shipping screws to avoid damage.

2. **SECURE TO TABLE:** In typical installations, the MT-500 is placed on an anti-vibration table and a microscope is placed on top of the translator. If desired, you can further secure the MT-500 with toe clamps (set of three provided). This configuration is the most stable mount for your microscope. Toe clamps are secured with 1/4-20 thumbscrews (provided). Photos below show how to install the toe clamps.

3. **SECURE MICROSCOPE TO TRANSLATOR:** Place microscope on top of translator and lightly tighten thumbscrews. Do not overtighten.
